Art Unit: 3714

The examiner appreciates the applicant's amendment to overcome the rejections of the previous office action. However, the examiner sets forth new grounds of rejection in view of the examiner's further consideration of the statutes of 35 USC 101 and 112.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11, 28, and 48-67 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are not directed to subject matter in the technological arts, the method capable of being performed using a mental process with the possible aid of pencil and paper. Furthermore, the claims are directed to gathering data and assigning of numerical values based on subjective observation, thus not producing reproducible and concrete results. No pre- or post-processing events take place. No machine utilizes the calculated rating data producing a tangible result. For example, in the medical field, heart rate data is gathered using a measuring means, the data is manipulated in a computer, and displayed as a useful EKG graph on a display means). Although claims 51 and 56 include a technological limitation of the use of a database, the process is still directed to data gathering and data manipulation without the pre- or post- processing steps discussed above. Please see MPEP 2106 for further information.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3714

Claims 11 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 11 and 28, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
